Abstract: Section 1414(c)(3)(A) of the Safe Drinking Water Act requires that each state that has primary enforcement authority under the Act shall prepare, make readily available to the public, and submit to the Administrator of EPA, an annual report of violations of national primary drinking water regulations in the state. The states' reports are to include violations of maximum contaminant levels, treatment requirements, variances and exemptions, and monitoring requirements determined to be significant by the Administrator after consultation with the states. To minimize a state's burden in preparing its annual statutorily required report, EPA issued

guidance that explains what Section 1414(c)(3)(A) requires and provides model language and reporting templates. EPA also annually makes available to the states a computer query that generates for each state (from information states are already separately required to submit to EPA's national database on a quarterly basis) the required violations information in a table consistent with the reporting template in EPA's guidance.

Form Numbers: None.

Respondents/affected entities: Entities that are potentially affected by this action are states that have primacy enforcement authority and meet the definition of "state" under the SDWA.

Respondent's obligation to respond: Mandatory under Section 1414 (c)(3)(A) of SDWA

Estimated number of respondents: 55 (total).

Frequency of response: Annually.

Total estimated burden: 4400 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$730,000 (per year), which includes \$0 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is no change in burden hours from the most recently approved. This is due to two considerations. First, the requirements under SDWA have not changed over the past three years and are not anticipated to change over the next three years. Secondly, the number of states, territories or tribes with primacy has not changed, and is not anticipated to change over the next three years, so there is no significant change in the overall burden. The costs have increased solely due to increases in labor rates, see Tables 1 and 2 for further information.

Director, Information Engagement Division.
