Permit No. 27514, issued on March 21, 2024 (89 FR 27418, April 17, 2024), authorizes the permit holder to conduct research on northern elephant seals (*Mirounga angustirostris*) in California, including unintentional harassment of California sea lions (*Zalophus californianus*), harbor seals (*Phoca vitulina*), and northern fur seals (*Callorhinus ursinus*). This permit was amended on July 11, 2024, increasing the unintentional harassment for California sea lions and northern fur seals. The permit holder is requesting the permit be amended to increase the number of northern elephant seals to be included in the infrared thermography project from 25 to 100 pups/juveniles and 50 adults to 200 non-pups (juveniles and adults of both sexes).

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.
