

## DEPARTMENT OF COMMERCE

### National Oceanic and Atmospheric Administration

[RTID 0648-XE606]

#### **Takes of Marine Mammals Incidental to Specified Activities; Taking Marine Mammals Incidental to the New London Pier Extension Project at the Naval Submarine Base**

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice; issuance of incidental harassment authorization.

**SUMMARY:** NMFS has received a request from the U.S. Navy (Navy) for the re-issuance of a previously issued incidental harassment authorization (IHA) with the only change being effective dates. The initial IHA authorized take of six species of marine mammals, by Level B harassment, and for take of harbor seals, gray seals, and harp seals by Level A harassment, incidental to construction associated with the New London Pier Extension Project at the Naval Submarine Base (SUBASE) New London in Groton, Connecticut. The project has been delayed and none of the work covered in the initial IHA has been conducted. The scope of the activities and anticipated effects remain the same, authorized take numbers are not changed, and the required mitigation, monitoring, and reporting remains the same as included in the initial IHA. NMFS is, therefore, issuing a second identical IHA to cover the incidental take analyzed and authorized in the initial IHA.

**DATES:** This IHA is effective from February 1, 2026, through January 31, 2027.

**ADDRESSES:** An electronic copy of the final 2024 IHA previously issued to the Navy, the Navy's application, and the **Federal Register** notices proposing and issuing the initial IHA may be obtained by visiting <https://www.fisheries.noaa.gov/action/incidental-take->

*authorization-united-states-navys-construction-us-naval-submarine-base-new*. In case of problems accessing these documents, please call the contact listed below (see **FOR FURTHER INFORMATION CONTACT**).

**FOR FURTHER INFORMATION CONTACT:** Rachel Wachtendonk, Office of Protected Resources, NMFS, (301) 427-8401.

**SUPPLEMENTARY INFORMATION:**

**Background**

Sections 101(a)(5)(A) and (D) of the Marine Mammal Protection Act (MMPA; 16 U.S.C. 1361 *et seq.*) direct the Secretary of Commerce (as delegated to NMFS) to allow, upon request, the incidental, but not intentional, taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and either regulations are issued or, if the taking is limited to harassment, a notice of a proposed authorization is provided to the public for review.

An authorization for incidental takings shall be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s), will not have an unmitigable adverse impact on the availability of the species or stock(s) for subsistence uses (where relevant), and if the permissible methods of taking and requirements pertaining to the mitigation, monitoring and reporting of such takings are set forth.

NMFS has defined “negligible impact” in 50 CFR 216.103 as an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival.

The MMPA states that the term “take” means to harass, hunt, capture, kill or attempt to harass, hunt, capture, or kill any marine mammal.

Except with respect to certain activities not pertinent here, the MMPA defines “harassment” as any act of pursuit, torment, or annoyance which (i) has the potential to injure a marine mammal or marine mammal stock in the wild (Level A harassment); or (ii) has the potential to disturb a marine mammal or marine mammal stock in the wild by causing disruption of behavioral patterns, including, but not limited to, migration, breathing, nursing, breeding, feeding, or sheltering (Level B harassment).

### **Summary of Request**

On June 14, 2024, NMFS published final notice of our issuance of an IHA authorizing take of marine mammals incidental to the New London Pier Extension Project at Naval the SUBASE New London in Groton, Connecticut (89 FR 50565). The effective dates of that IHA were December 1, 2024, through November 30, 2025. On November 20, 2024, the Navy informed NMFS that the project was delayed. None of the work identified in the initial IHA (e.g., pile driving and removal) has occurred. The Navy submitted a request that we issue an identical IHA that would be effective from February 1, 2026, through January 31, 2027, in order to conduct the construction work that was analyzed and authorized through the previously issued IHA. Therefore, issuance of the IHA is appropriate.

### **Summary of Specified Activity and Anticipated Impacts**

The planned activities (including mitigation, monitoring, and reporting), authorized incidental take, and anticipated impacts on the affected stocks are the same as those analyzed and authorized through the previously issued IHA.

The purpose of this project is to extend the existing Pier 31 to provide two berths for a submarine platform that is approximately 80 ft longer than the existing submarines. The location, timing, and nature of the activities, including the types of equipment planned for use, are within scope of those described in the initial IHA. The mitigation and monitoring are also as prescribed in the initial IHA.

Species that are expected to be taken by the planned activity include Atlantic white-sided dolphin (*Lagenorhynchus acutus*), harbor porpoise (*Phocoena phocoena*), gray seal (*Halichoerus grypus*), harbor seal (*Phoca vitulina*), and harp seal (*Pagophilus groenlandicus*). A description of the methods and inputs used to estimate take anticipated to occur and the take that was authorized is found in the **Federal Register** notice of the proposed IHA (89 FR 27717, April 18, 2024). The data inputs and methods of estimating take are identical to those used in the initial IHA. NMFS has reviewed recent Stock Assessment Reports, information on relevant Unusual Mortality Events, and recent scientific literature, and determined that our original analysis of impacts and take estimate under the initial IHA remains valid.

We refer to the documents related to the previously issued IHA, which include the **Federal Register** notice of the issuance of the initial 2024 IHA for the Navy's construction work (89 FR 50565, June 14, 2024), the Navy's application, the **Federal Register** notice of the proposed IHA (89 FR 27717, April 18, 2024), and all associated references and documents.

### **Determinations**

The Navy will conduct activities as analyzed in the initial 2024 IHA. As described above, the number of authorized takes of the same species and stocks of marine mammals are identical to the numbers that were found to meet the negligible impact and small numbers standards and authorized under the initial IHA and no new information has emerged that would change those findings. The new issued IHA includes identical required mitigation, monitoring, and reporting measures as the initial IHA, and there is no new information suggesting that our analysis or findings should change.

Based on the information contained here and in the referenced documents, NMFS has determined the following: (1) the required mitigation measures will effect the least practicable impact on marine mammal species or stocks and their habitat; (2) the

authorized takes will have a negligible impact on the affected marine mammal species or stocks; (3) the authorized takes represent small numbers of marine mammals relative to the affected stock abundances; and (4) the Navy's activities will not have an unmitigable adverse impact on taking for subsistence purposes as no relevant subsistence uses of marine mammals are potentially effected by this action.

### **National Environmental Policy Act**

This action is consistent with categories of activities identified in Categorical Exclusion B4 (incidental take authorizations with no anticipated serious injury or mortality) of the Companion Manual for NOAA Administrative Order 216-6A, which do not individually or cumulatively have the potential for significant impacts on the quality of the human environment and for which we have not identified any extraordinary circumstances that would preclude this categorical exclusion. Accordingly, NMFS determined that the issuance of the initial IHA qualified to be categorically excluded from further National Environmental Policy Act review. NMFS has determined that the application of this categorical exclusion remains appropriate for this reissued IHA.

### **Endangered Species Act**

Section 7(a)(2) of the Endangered Species Act of 1973 (ESA; 16 U.S.C. 1531 *et seq.*) requires that each Federal agency insure that any action it authorizes, funds, or carries out is not likely to jeopardize the continued existence of any endangered or threatened species or result in the destruction or adverse modification of designated critical habitat. To ensure ESA compliance for the issuance of IHAs, NMFS consults internally whenever we propose to authorize take for endangered or threatened species.

No incidental take of ESA-listed species is authorized or expected to result from this activity. Therefore, NMFS determined that formal consultation under section 7 of the ESA is not required for this action.

### **Authorization**

NMFS has issued an IHA to the Navy for in-water construction activities associated with the specified activity from February 1, 2026, through January 31, 2027. All previously described mitigation, monitoring, and reporting requirements from the initial 2024 IHA are incorporated.

Dated: January 15, 2025.
