Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Wood Furniture Manufacturing Operations (40 CFR part 63, subpart JJ) were proposed on December 6, 1994; promulgated on December 7, 1995; and amended on both November 21, 2011, and November 19, 2020. These standards apply to both existing and new wood furniture manufacturing operations that are major sources of hazardous air pollutants (HAPs). A "major source" is a stationary source or group of stationary sources that either emit or have the potential to emit 10 tons per year (tpy) or more of a single HAP or 25 tpy or more of a combination of

HAPs. New facilities include those that commenced construction, modification, or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR part 63, subpart JJ.

These standards also apply to existing and new incidental sources and to area sources. These sources are required to maintain purchase or usage records demonstrating that they meet the definition for incidental or area sources. Incidental and area sources are not subject to any other provisions of these standards. An “incidental source,” is a major source that is primarily engaged in the manufacture of products other than wood furniture or wood furniture components, and that uses no more than 100 gallons per month of finishing material or adhesives in the manufacture of wood furniture or wood furniture components. An “area source” is any stationary source that is not a major source.

Form Numbers: None.

Respondents/affected entities: Wood furniture manufacturing facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart JJ).

Estimated number of respondents: 230 (total).

Frequency of response: Initially, occasionally, quarterly, semiannually, and annually.

Total estimated burden: 15,900 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$2,020,000 (per year), includes \$17,400 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is no change in burden from the recently approved ICR. This is due to two considerations. First, the regulations have not changed over the past three years and are not anticipated to change over the next three years. Second, the growth rate for this industry is very low or non-existent, so there is no significant change in the overall burden. There is also an increase in O&M costs due to an adjustment. The O&M costs were adjusted from 2001 \$ to 2022 \$ using the CEPCI Index.

Director, Information Engagement Division.
