*Abstract:* The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Leather Finishing Operations (40 CFR Part 63, Subpart TTTT) were proposed on October 2, 2000; promulgated on February 27, 2002; and most-recently amended on February 12, 2019. These regulations apply to existing and new leather finishing facilities that are major sources of HAP or are collocated with other sources that are individually or collectively a major source of HAP emissions. New facilities include those that commenced either construction or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR

Part 63, Subpart TTTT.

*Form Numbers:* None.

*Respondents/affected entities:* Leather finishing operations.

*Respondent's obligation to respond:* Mandatory (40 CFR Part 63, Subpart TTTT).

*Estimated number of respondents:* 4 (total).

*Frequency of response:* Initially, occasionally, and annually.

*Total estimated burden:* 138 hours (per year). Burden is defined at 5 CFR 1320.03(b).

*Total estimated cost:* \$17,400 (per year), which includes \$0 annualized capital or operation & maintenance costs.

*Changes in the Estimates:* There is no change in hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This is due to two considerations. First, the regulations have not changed over the past three years and are not anticipated to change over the next three years. Second, the growth rate for the industry is very low, negative, or non-existent, so there is no significant change in the overall burden.

*Director, Information Engagement Division.*
