SUPPLEMENTARY INFORMATION: Under part 211 of title 49 Code of Federal Regulations (CFR), this document provides the public notice that by letter received January 8, 2025, SMART petitioned FRA for a waiver of compliance from certain provisions of the Federal railroad safety regulations contained at 49 CFR part 238 (Passenger Equipment Safety Standards). FRA assigned the petition Docket Number FRA-2025-0022.

Specifically, SMART seeks relief from § 238.309(b)(3), *Periodic brake equipment maintenance*, for 18 Nippon Sharyo DMUs equipped with Knorr Brake Company (KBC) KBCT1 air brake systems. SMART requests one-time relief to extend the DMUs' COT&S intervals from the 1,840 days specified in the regulation to 2,392 days (an additional 18 months), as KBC is experiencing delayed delivery times. SMART states that brake units will not begin being shipping to SMART until late April 2026. To support its request, SMART detailed in its petition the current and future safety measures it will take during the proposed COT&S interval extension.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at www.regulations.gov.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. Communications received by **[INSERT DATE 30 DAYS AFTER DATE OF PUBLICATION IN THE FEDERAL REGISTER]** will be considered by FRA before final action is taken. Comments received after that date will be considered if practicable.
