The FCC's consumer IoT cybersecurity labeling program will provide consumers with easily understood, accessible information on the relative security of a consumer IoT product they are considering for purchase, which will increase the security of devices consumers bring into their homes and as part of a national IoT ecosystem. CLAs will be authorized by the Commission to certify use of the FCC IoT Label, which includes the U.S. government certification mark (U.S. Cyber Trust Mark), by manufacturers whose products are found to be in compliance with the Commission's IoT cybersecurity labeling program rules. The September 2024 Public Notice adopted rules for the CLAs and the Lead Administrator to reduce the risk of unauthorized access, use, disclosure, disruption, modification, or destruction of program data. Under this collection, each CLA will be required to create, update, and implement a cybersecurity risk management plan identifying the cyber risks that the entity faces, the controls used to mitigate those risks, and the steps taken to ensure that these controls are applied effectively to their operations. The plan must also describe how the CLA employs its organizational resources and processes to ensure the confidentiality, integrity, and availability of its information and information systems. The CLA's cybersecurity risk management plan must

be available to the Commission upon request.
