Requirements.

**B. Need and Uses**

This clearance covers the information that contractors may be required to submit to comply with the following Federal Acquisition Regulation (FAR) clauses:

• FAR Inspection Clauses

- ✓ FAR 52.246-2, Inspection of Supplies—Fixed-Price
- ✓ FAR 52.246-3, Inspection of Supplies—Cost-Reimbursement
- ✓ FAR 52.246-4, Inspection of Services—Fixed-Price
- ✓ FAR 52.246-5, Inspection of Services—Cost-Reimbursement
- ✓ FAR 52.246-6, Inspection—Time-and-Material and Labor-Hour
- ✓ FAR 52.246-7, Inspection of Research and Development—Fixed-Price
- ✓ FAR 52.246-8, Inspection of Research and Development—Cost-Reimbursement
- ✓ FAR 52.246-12, Inspection of Construction

These FAR clauses require the contractor to provide and maintain an inspection system that is acceptable to the Government, and to keep complete records of all inspection work performed and make it available to the Government. These clauses give the Government the right to inspect and test all work.

Records required under these clauses are kept as a part of a contractor's normal business operations. To ensure they provide a quality product or service, every business must have standards and methods for reviewing or inspecting the quality of their product or service. These standards will differ by industry and the complexity of the product or service provided.

The Government relies on a contractor's existing quality assurance system for contracts for commercial products. The Government relies on the contractor to accomplish all inspection and testing needed to ensure that acquired commercial services conform to contract requirements before they are tendered to the Government. See FAR 12.208 and 46.202-1. Likewise, when the contract amount is expected to be less than the simplified acquisition threshold, these clauses do not apply.

The FAR "inspection clauses" are used for quality assurance depending on the type of contract, or the product or service being provided. These clauses do not require the transmittal or sending of documentation to the Government, but they have record keeping requirements. The Government may review these records to confirm the contract quality requirements are being met. This review is risk-based and may or may not include the review of all quality assurance records. Generally, the records are more likely to be reviewed when the contractor is not meeting quality

standards or as part of Government Contract quality assurance surveillance for complex requirements. Subject matter experts estimate these records are requested from 10 percent or fewer of contractors.

The information is used to assure that supplies and services provided under Government contracts conform to contract requirements.

- FAR 52.246-15, Certificate of Conformance. This clause requires the contractor to complete and sign a certificate of conformance (CoC). This clause is used in solicitations and contracts for supplies or services at the discretion of the contracting officer when it is in the Government's interest, small losses would be incurred in the event of a defect; or because of the contractor's reputation or past performance, or when it is likely that the supplies or services furnished will be acceptable and any defective work would be replaced, corrected, or repaired without contest.

- FAR 52.246-26, Reporting Nonconforming Items. This clause requires contractors to provide written notification to the contracting officer within 60 days of becoming aware or having reason to suspect, such as through inspection, testing, record review, or notification from another source (e.g., seller, customer, third party) that any end item, component, subassembly, part, or material contained in supplies purchased by the contractor for delivery to, or

for, the Government is counterfeit or suspect counterfeit. This clause requires certain contractors to submit a report to the Government-Industry Data Exchange Program (GIDEP) system at [www.gidep.org](http://www.gidep.org) within 60 days of becoming aware or having reason to suspect, such as through inspection, testing, record review, or notification from another source (e.g., seller, customer, third party) that an item purchased by the contractor for delivery to, or for, the Government is a counterfeit or suspect counterfeit item; or a common item that has a major or critical nonconformance.

This information will be used by the Government to address and detect nonconforming and counterfeit items. Perhaps more important, this information will be available to businesses for searching prior to placing orders, thus enabling the avoidance of purchasing counterfeit items in the first place.
