SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of the continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, the collection instruments are clearly understood, and OSHA’s estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (OSH Act) (29 U.S.C. 651 et seq.) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of effort in obtaining information (29 U.S.C. 657).

The following sections describe who uses the information collected under each requirement, as well as how they use it. The purpose of these requirements is to provide

protection for workers from the adverse health effects associated with exposure to Lead. In this regard, the Lead in General Industry Standard requires: monitoring workers' exposure to lead, medical surveillance by physicians through biological monitoring and examinations, and recordkeeping and notification obligations.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the agency's functions to protect workers, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information, and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend the approval of the information collection requirements contained in the Lead in General Industry Standard. The agency is requesting an adjusted increase in burden hours, from 1,134,438 hours to 1,250,537 hours, a difference of 116,099 hours. The adjustment increase is due to an increase in the number of employers (56,906 to 60,569 employers) and an increase in the number of exposed workers (346,894 to 366,629 exposed workers), based on updated data. Also, due to the increase in the estimated number of initial exposure monitoring, initial medical examinations, as well as increased costs to perform biological monitoring and medical examinations under the standard, there is an increase in total operation and maintenance costs of \$51,775,260 (from \$145,080,120 to \$196,201,192).

OSHA will summarize the comments submitted in response to this notice and will include this summary in the request to OMB to extend the approval of the information collection requirements.

Type of Review: Extension of a currently approved collection.
