A variety of laws, Executive Orders (EOs), and NOAA strategies and policies include requirements for economic data and the analyses they support. When met adequately, those requirements allow better-informed conservation and management decisions on the use of living marine resources and marine habitat in federally managed fisheries. Obtaining these data improves the ability of NOAA Fisheries and the Regional Fishery Management Councils (Councils) to monitor, explain and predict changes in the economic performance and impacts of federally managed commercial fisheries. Measures of economic performance include costs, earnings, and profitability (net revenue); productivity and economic efficiency; capacity; economic stability; the level and distribution of net economic benefits to society; and market

power. The economic impacts include sector, community or region-specific and national employment, sales, value-added, and income impacts. Economic data are required to support more than a cursory effort to comply with or support the following laws, EOs, and NOAA strategies and policies:

1. Magnuson-Stevens Fishery Conservation and Management Act (MSA)
2. Marine Mammal Protection Act (MMPA)
3. Endangered Species Act (ESA)
4. National Environmental Policy Act (NEPA)
5. Regulatory Flexibility Act (RFA)
6. EO 12866 (Regulatory Planning and Review)
7. The NOAA Fisheries Guidelines for Economic Reviews of Regulatory Actions
8. NOAA FY22-26 Strategic Plan, Building a Climate Ready Nation
9. The NOAA Fisheries Strategic Plan 2022-2025 (Strategic Plan)
10. The NOAA Fisheries Ecosystem-Based Fishery Management (EBFM) Road Map
11. The NOAA Fisheries National Bycatch Reduction Strategy
12. NOAA's Catch Share Policy.

Data collections will focus each year on a different set of the 16 commercial fisheries or groups of fisheries. This cycle of data collection will facilitate economic data being available and updated for all those commercial fisheries.

There will be an effort to coordinate the data collections in order to reduce the additional burden for those who participate in multiple fisheries. To further reduce the burden, the requested information for a specific fishery will be limited to that which is not available from other sources. Participation in these data collections will be voluntary.

Affected Public: Individuals/households and business or other for-profit organizations.

Frequency: Every 3 to 8 years for 15 of the fisheries and on average 2.7 times per year for the other fisheries.

Respondent's Obligation: Voluntary.

Legal Authority: Magnuson-Stevens Fishery Conservation and Management Act, Marine Mammal Protection Act, Endangered Species Act, National Environmental Policy Act, and Regulatory Flexibility Act.
