This notice allows for an additional 30 days for public comments.

Title: NWS Customer Satisfaction and Feedback

OMB Control Number: 0648-0342

Form Number(s): None

Type of Request: Regular submission. Extension and revision of a current information collection.

Number of Respondents: 30,000 / 10,000 annualized.

Average Hours Per Response: 7 minutes per response.

Total Annual Burden Hours: 5,001 hours / 1,667 hours annualized.

Needs and Uses: This is an extension and revision of a current collection of information.

This request is for a revision and extension of a currently approved generic information collection. The question bank has been revised to ensure compliance and alignment with current Administration priorities and Executive Orders.

This collection follows the guidelines contained in the OMB Resource Manual for Customer Surveys. In accordance with Executive Order 12862, the National Performance Review, and good management practices, National Oceanic and Atmospheric Administration (NOAA) offices seek approval to continue to gather customer feedback on services and/or products which can be used in planning for service/product modification and prioritization. Under this generic clearance, individual offices would use approved questionnaires and develop new questionnaires, as needed, by selecting subsets of the approved set of collection questions and tailoring those specific questions to be meaningful for their particular programs. These proposed questionnaires would then be submitted to OMB using a fast-track request for approval process, for which separate Federal Register notices are not required.

This generic clearance will not be used to survey any bodies NOAA regulates unless precautions are taken to ensure that the respondents believe that they are not under any risk for not responding or for the contents of their responses, e.g., in no survey to such a population will the names and addresses of respondents be required.

Two sets of survey questions are used for generation of program-level questionnaires. Quantitative questions seek to obtain numerical ratings from respondents on their satisfaction with various aspects of the product or service they obtained – satisfaction with the quality of the product, the courtesy of the staff, the format of and documentation for data received, and similar standard types of questions. The offices using such questions are able to determine which aspects of their program need improvement or have improved. Qualitative questions are more focused on who is using the product and service, how it is being used, and the medium or format in which the respondent would like to see data provided.

Affected Public: Individuals or households; Business or other for-profit organizations; Not-for-profit institutions; State, Local, or Tribal government; Federal government.

Frequency: 5-10 times a year

Respondent's Obligation: Voluntary

Legal Authority: Weather Research and Forecasting Innovation Act of 2017
