**[Project No. 7189-015]**

### **Green Lake Water Power Company; Notice of Availability Of Environmental Assessment**

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR part 380, the Office of Energy Projects has reviewed the application for a subsequent license to continue to operate and maintain the Green Lake Hydroelectric Project (Green Lake Project, or project). The project is located on Reeds Brook in Hancock County, Maine. Commission staff has prepared an Environmental Assessment (EA) for the project.

The EA contains staff's analysis of the potential environmental impacts of the project and concludes that licensing the project, with appropriate environmental protective measures, would not constitute a major Federal action that would significantly affect the quality of the human environment.

The Commission provides all interested persons with an opportunity to view and/or print the EA via the Internet through the Commission's Home Page (<https://www.ferc.gov/>), using the "eLibrary" link. Enter the docket number, excluding the last three digits, in the docket number field to access the document.
