**SUPPLEMENTARY INFORMATION:**

**I. Background**

The Department of Labor, as part of the continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, the collection instruments are clearly understood, and OSHA’s estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (OSH Act) (29 U.S.C. 651 et seq.) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of effort in obtaining information (29 U.S.C. 657).

The following sections describe who uses the information collected under each requirement, as well as how they use it. The collections of information specified in the Noise Standard (29 CFR 1910.95) protect workers from suffering material hearing impairment. The collections of information contained in the Noise Standard include conducting noise monitoring; notifying workers when they are exposed at or above an 8-hour time-weighted average of 85 decibels; providing workers with initial and annual audiograms; notifying workers of a loss in hearing based on comparing audiograms; maintaining records of workplace noise exposure and workers' audiograms; and allowing workers access to materials and records required by the Standard.

## **II. Special Issues for Comment**

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the agency's functions to protect workers, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information, and transmission techniques.

## **III. Proposed Actions**

OSHA is requesting that OMB extend the approval of the information collection requirements contained in Occupational Exposure to Noise Standard. The agency is requesting an adjustment increase in burden hours from 2,368,281 hours to 2,443,146 hours, a difference of 74,865 hours. The adjustment increase in the burden hours is due to an increase in the number of establishments going from 283,524 to 285,510 and the

increase in the number of employees exposed above 85 dBA going from 3,802,698 to 3,935,792.

OSHA will summarize the comments submitted in response to this notice and will include this summary in the request to OMB to extend the approval of the information collection requirements.

<i>Type of Review:</i>	Extension of a currently approved collection.
<i>Title:</i>	Occupational Exposure to Noise Standard (29 CFR 1910.95)
