SUPPLEMENTARY INFORMATION:

I. Background, Purpose and Legal Basis

SE 17th Street (Brooks Memorial) Bridge across the AICW, mile 1065.9, at Fort Lauderdale, FL, is a bascule bridge with a 55-foot vertical clearance at mean high water in the closed position. The normal operating schedule for the bridge is set forth in 33 CFR 117.261(bb)(8).

The Coast Guard received a request from the City of Fort Lauderdale to consider placing additional opening restrictions during weekday rush hour periods to assist with vehicle congestion. The drawbridge currently opens twice an hour for navigation. This temporary deviation will allow the drawbridge to open once an hour during designated rush hour periods and twice an hour all other times. This test deviation will assist with determining if the reasonable needs of navigation are maintained and whether a permanent change to the schedule is needed.

Under this temporary deviation, the SE 17th Street (Brooks Memorial) Bridge will open on the hour and half-hour; except that from 6:50 a.m. to 9:10 a.m. and from 3:50 p.m. to 6:10 p.m., Monday through Friday, except Federal holidays, the drawbridge will open once an hour at the top of the hour. Public vessels of the United States and tugs with tows, upon proper signal, will be passed through any time. Vessels able to pass without an opening may do so at any time.

The Coast Guard will also inform the users of the waterways through our Local and Broadcast Notices to Mariners of the temporary change in operating schedule for the

bridge so that vessel operators can arrange their transits to minimize any impact caused by the temporary deviation.

This test deviation will run simultaneously with a Notice of Proposed Rulemaking, under the same name and docket number. Both documents can be found at <https://www.regulations.gov> and comments can be made to either document.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the effective period of this temporary deviation. This deviation from the operating regulations is authorized under 33 CFR 117.35.
