AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule; administrative change.

SUMMARY: The Environmental Protection Agency (EPA) is updating the regulatory materials that are incorporated by reference into the Idaho State Implementation Plan (SIP). The EPA is also notifying the public of corrections and clarifying changes in the Code of Federal Regulations tables that identify the regulatory materials incorporated by reference into the Idaho SIP. This update affects the materials that are available for public inspection at the National Archives and Records Administration and the EPA Region 10 Office.

SUPPLEMENTARY INFORMATION:

I. Background

Each State has a SIP containing the control measures and strategies used to attain and

maintain the national ambient air quality standards (NAAQS). The SIP is extensive, including such elements as air pollution control regulations, source-specific permit requirements, emission inventories, monitoring networks, attainment demonstrations, and enforcement mechanisms.

Each State must formally adopt air pollution control measures and strategies and submit the associated regulatory materials to the EPA for approval into the SIP. Upon EPA approval, regulatory materials are incorporated into the federally approved SIP in title 40 of part 52, “Approval and Promulgation of Implementation Plans,” of the Code of Federal Regulations (40 CFR part 52). The full text of a State regulation approved by the EPA is not reproduced in its entirety in 40 CFR part 52, rather, it is “incorporated by reference (IBR).” This means that the EPA has approved a given State regulation, or changes to that regulation, based on a specific effective date. The public is referred to the location of the full text version of the regulation. The information provided allows the EPA and the public to monitor the extent to which a State implements a SIP to attain and maintain the NAAQS and to take enforcement action for violations of the SIP.

Each SIP is a living document revised as necessary by a State to address Clean Air Act requirements and the unique air pollution problems in the State. Therefore, the EPA must routinely take action on SIP revisions that include new or revised State regulatory materials. A State may revise one or more regulations in their entirety, or portions of regulations. The State indicates the submitted changes by using redline/strikethrough text, for example, and the EPA takes action on the changes. The EPA establishes a docket for each action using a unique Docket Identification Number and places the submitted regulations and other materials supporting the action in the docket. Dockets are available for viewing on www.regulations.gov.

On May 22, 1997 (62 FR 27968), the EPA, in coordination with the Office of the Federal Register, revised the procedures used to incorporate State regulatory materials by reference into the CFR for each SIP. These changes revised the format for the identification of the SIP in 40 CFR part 52, streamlined the mechanism for announcing EPA approval of revisions to a SIP, and

consolidated the process for EPA updates to the IBR materials in 40 CFR part 52. The revised IBR procedures called for the EPA to maintain “SIP Compilations” with the full text of the federally approved State regulatory materials.

The EPA generally updates each SIP Compilation every few years, or more frequently when large amounts of regulatory materials have been incorporated by reference. Under the revised procedures, the EPA must periodically publish an informational document in the rules section of the *Federal Register* notifying the public that updates have been made to a specific SIP Compilation. The EPA began applying the revised IBR procedures to the Idaho SIP on January 25, 2005 (70 FR 3479) and subsequently published updates to the IBR materials in the Idaho SIP on December 28, 2012 (77 FR 76417), April 1, 2015 (80 FR 17333), July 24, 2020 (85 FR 44741), and November 18, 2024 (89 FR 90592).

C. Corrections and Clarifications to CFR Tables

The EPA is notifying the public of corrections and clarifications to the CFR tables that identify the IBR materials in the Idaho SIP. The EPA has made minor wording changes to the “Explanations” column of the tables for consistency. We have also removed the text from the “Explanations” column for entries “600” through “616” because the text referred to a prior EPA

approval date of July 11, 2005 that was then removed in response to a court remand. Entries “600” through “616” have been revised and approved numerous times since 2005 and therefore the text referencing the prior July 11, 2005, EPA approval date is obsolete.

II. EPA Action

In this action, the EPA is notifying the public of an update to the regulatory materials incorporated by reference into the Idaho SIP and federally effective as of January 6, 2025. This update includes regulatory materials submitted by Idaho and approved by the EPA since the last IBR update. *See* 89 FR 90592 (November 18, 2024).

III. Good Cause Exemption

The EPA has determined that this action falls under the “good cause” exemption in section 553(b)(3)(B) of the Administrative Procedure Act (APA) which, upon finding “good cause,” authorizes agencies to dispense with public participation and section 553(d)(3) which allows an agency to make an action effective immediately (thereby avoiding the 30-day delayed effective date otherwise provided for in the APA). This administrative action simply codifies provisions which are already in effect as a matter of law in Federal and approved State programs, makes corrections and clarifying changes to the tables in the CFR, and makes ministerial changes to the prefatory heading to the tables in the CFR. Under section 553 of the APA, an agency may find good cause where procedures are “impracticable, unnecessary, or contrary to the public interest.” Public comment for this administrative action is “unnecessary” and “contrary to the public interest” since the codification (and corrections) only reflect existing law. Immediate notice of this action in the *Federal Register* benefits the public by providing the public notification of the updated Idaho SIP Compilation and notification of corrections to the Idaho “Identification of Plan” portion of the CFR. Further, pursuant to section 553(d)(3), making this action immediately effective benefits the public by immediately updating both the SIP Compilation and the CFR “Identification of plan” section (which includes table entry corrections and clarifications).

IV. Incorporation by Reference

In this document, The EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, the EPA is finalizing the incorporation by reference of regulations promulgated by Idaho, previously approved by the EPA and federally effective before January 6, 2025 as described in section I. of this document. The EPA has made, and will continue to make, these materials generally available through www.regulations.gov and at the EPA Region 10 Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

V. Statutory and Executive Order Reviews

Under the Clean Air Act (CAA), the Administrator is required to approve a SIP submission that complies with the provisions of the CAA and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, The EPA's role is to approve State choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves State law as meeting Federal requirements and does not impose additional requirements beyond those imposed by State law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- Is not subject to Executive Order 14192 (90 FR 9065, February 6, 2025) because SIP actions are exempt from review under Executive Order 12866;
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-

4);

- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997) because it approves a State program;
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001); and
- Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA.

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian Tribe has demonstrated that a Tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and it will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. The EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the *Federal Register*. A major rule cannot take effect until 60 days after it is published in the *Federal Register*. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

The EPA also believes that the provisions of section 307(b)(1) of the CAA pertaining to petitions for judicial review are not applicable to this action. This is because prior EPA

rulemaking actions for each individual component of the Idaho SIP Compilation previously afforded interested parties the opportunity to file a petition for judicial review in the United States Court of Appeals for the appropriate circuit within 60 days of such rulemaking action. Thus, the EPA believes judicial review of this action under section 307(b)(1) is not available.
