SUPPLEMENTARY INFORMATION:

I. Background

In accordance with section 51.118 of title 10 of the *Code of Federal Regulations*, "Final environmental impact statement—notice of availability," the NRC is making available to the public NUREG-1437, Supplement 62. A Notice of Availability of the draft of NUREG-1437, Supplement 62 was published in the *Federal Register* on November 1, 2024 (89 FR 87433). The U.S. Environmental Protection Agency issued its Notice of Availability on November 1, 2024 (89 FR 87366). The public comment period on the draft of NUREG-1437, Supplement 62 ended on December 16, 2024, and the comments received are addressed in NUREG-1437, Supplement 62.

II. Discussion

The draft of NUREG-1437, Supplement 62 was issued for public comment on November 1, 2024. NUREG-1437, Supplement 62 addresses the comments received. As discussed in Chapter 4 of NUREG-1437, Supplement 62, the NRC staff has determined that the adverse environmental impacts of license renewal for Diablo

Canyon (i.e., the continued operation of Diablo Canyon for a period of 20 years beyond the expiration dates of the current operating licenses) are not so great that preserving the option of license renewal for energy-planning decision-makers would be unreasonable. This recommendation is based on: (1) information in the environmental report, as supplemented, and other documents submitted by Pacific Gas and Electric Company; (2) consultation with Federal, State, Tribal, and local governmental agencies; (3) the NRC staff's independent environmental review; and (4) the NRC staff's consideration of public comments received during the scoping process and on the draft of NUREG-1437, Supplement 62.

Dated: June 24, 2025.

For the Nuclear Regulatory Commission.

Kimyata Morgan-Butler,
*Acting Deputy Director,
Division of Rulemaking, Environmental, and
Financial Support,
Office of Nuclear Material Safety and
Safeguards.*
