The existing spillway is an uncontrolled concrete gravity structure with a 239-foot-width overflow section. The 600-foot-long spillway chute is a sloped, concrete-lined, and trapezoidal channel. The base width of the spillway chute measures 90 feet at the upstream end and narrows to 40 feet at the downstream end. The spillway apron consists of a curved, trapezoidal, and concrete-lined channel with short vertical training walls.
