SUPPLEMENTARY INFORMATION:

Title: Federal Plant Pest and Noxious Weeds Regulations.

OMB Control Number: 0579-0054.

Type of Request: Revision to and extension of approval of an information collection.

Abstract: The Plant Protection Act (the Act, 7 U.S.C. 7701 *et seq.*) authorizes the Secretary of Agriculture to restrict the importation, entry, exportation, or interstate movement of plants, plant products, biological control organisms, noxious weeds, articles, or means of conveyance, if the Secretary determines that the prohibition or restriction is necessary to prevent the introduction of plant pests or noxious weeds into the United States or their dissemination within the United States. The associated regulations that were issued by the Animal and Plant Health Inspection Service (APHIS) are located in 7 CFR parts 330 and 360.

These regulations contain information collection activities that include, but are not limited to, applications, amendments, withdrawals, cancellations, and appeals for permits; petitions to add or remove plant pests to exemption and plant pest lists; cooperative agreements and compliance agreements; consultations; site assessments; inspections; certifications; notifications of intent, appeals, amendments, and cancellations; labeling of boxes, containers, and bags; emergency action notifications; notices of arrival; and recordkeeping. These information collection activities allow APHIS to evaluate the risks associated with the importation or interstate movement of plant pests, noxious weeds, and soil, and also assist with developing risk mitigations, if necessary, for the importation or interstate movement of plant pests, noxious weeds, and soil.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

- (1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;
- (2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- (3) Enhance the quality, utility, and clarity of the information to be collected; and
- (4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

Estimate of burden: The public burden for this collection of information is estimated to average 0.25 hours per response.

Respondents: Importers and shippers of plant pests, noxious weeds, and other regulated articles; owners/operators of regulated garbage-handling facilities; State plant health officials; Tribal groups; and individuals.

Estimated annual number of respondents: 5,667.

Estimated annual number of responses per respondent: 14.

Estimated annual number of responses: 79,136.

Estimated total annual burden on respondents: 19,537 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 8th day of July 2025.

Michael Watson,

Administrator, Animal and Plant Health Inspection Service.
