SUPPLEMENTARY INFORMATION: Under part 211 of title 49 Code of Federal Regulations (CFR), this document provides the public notice that by letter received July 7, 2025, SAN petitioned FRA for a waiver of compliance from certain provisions of the Federal railroad safety regulations contained at 49 CFR part 237 (Bridge Safety Standards). FRA assigned the petition Docket Number FRA-2021-0024.

Specifically, SAN requests relief from § 237.31, *Adoption of bridge management programs*, for its weigh-in-motion scale that is considered a “railroad bridge” under § 237.5, *Definitions*.¹ In support of its request, SAN states that it has no “actual bridges” and that “the reoccurring costs of maintaining the Bridge Management Program for a single scale with 2 inches of ground clearance could be invested in structural or operational improvements that would benefit safety without negatively impacting the risk of human casualties, environmental damage, or disrupting the Nation’s railroad transportation system.” SAN adds that the scale’s structural integrity is essential for its operation and accuracy and that the scale is inspected weekly by track inspectors.
