1. Description of Request: Northern States Power Company - Wisconsin, the licensee for the project, requests Commission approval to construct a new dike at the Turtle-Flambeau Reservoir to comply with the Commission's dam safety guidelines. The project operates under a license issued by the Commission on February 5, 1997, which was later amended by an order on October 14, 2008, to include the Turtle-Flambeau Reservoir as a project feature. The Turtle-Flambeau Reservoir is owned and operated by the Chippewa and Flambeau Improvement Company (CFIC), in which the licensee holds a majority ownership interest. In 2007, CFIC conducted a probable maximum flood study for the Turtle-Flambeau Reservoir, which identified low areas along the reservoir rim that could overtop during extreme flood events. The Turtle-Flambeau development includes nine earthen embankment sections with crest elevations ranging from approximately 1,574 to 1,577 feet (National Geodetic Vertical Datum of 1929 (NGVD29) + 0.3 foot); a concrete gravity non-overflow dam with a crest elevation of 1,577 feet (NGVD29 + 0.3 foot); a short closed dam section; and three 19-foot-wide by 12-foot-high steel Tainter gates with a crest elevation of 1,560 feet (NGVD29 + 0.3 foot).
