Abstract of information available

Human remains representing, at least, one individual have been identified. The five lots of associated funerary objects are botanicals; ceramics; faunal; lithics; and objects placed with or near human remains. These individuals and objects were recovered from the Hamby site,

40CF214, in Coffee County, TN, by Charles Faulkner and James E. Cobb in March 1977. This site dates to the Late Middle Woodland (late Owl Hollow), post 600 CE. These individuals and objects were transferred to UTK after the excavation and retained. To our knowledge, no potentially hazardous substances have been used to treat any of the Ancestral remains or associated funerary objects.

Cultural affiliation

Based on the information available and the results of consultation, cultural affiliation is clearly identified by the information available about the human remains and associated funerary objects described in this notice.

Determinations

UTK has determined that:

- The human remains described in this notice represent the physical remains of one individual of Native American ancestry.
- The five lots of objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- There is a connection between the human remains and associated funerary objects described in this notice and the Alabama-Coushatta Tribe of Texas; Cherokee Nation; Eastern Band of Cherokee Indians; The Chickasaw Nation; The Muscogee (Creek) Nation; The Seminole Nation of Oklahoma; Thlopthlocco Tribal Town; and the United Keetoowah Band of Cherokee Indians in Oklahoma.
