SUPPLEMENTARY INFORMATION:

Description: The Current Population Survey-Child Support Supplement collects detailed information about child support agreements and awards, including both required payments and amounts received, as well as data about the socioeconomic characteristics of custodial parents and their families. Analysis of the information provides a nationwide assessment of the need for and effectiveness of the child support program, which helps OCSE align the child support program to meet the needs of the families it serves. The survey analysis will also help legislators make child support policy decisions. OCSE revised the survey to delete questions and update language.

Respondents: Individuals and households

Annual Burden Estimates

In 2023, the Census Bureau began to collect information about the family relationships among all the individuals in the household by identifying the biological, adopted, step, or foster parents for each child in the household. Households with children under 21 not living

with both biological or adopted parents are asked questions in the Child Support Supplement. This change reduced the overall number of respondents significantly from 34,500 to 3,600 but increased the time per response from about 2 minutes to about 20 minutes. The U.S. Census Bureau performed a calculation of the time it took to conduct the 2023 interviews, using audit trails from the completed cases. The 2026 increase in the burden hours reflects this information.

Collection Instrument	Annual Number of Respondents	Annual Number of Responses Per Respondent	Average Burden Hours Per Response	Total Annual Burden Hours
Current Population Survey-Child Support Supplement	4,500	1	0.0667	300
