m. Description of Request: The licensee submitted a request on behalf of River Sand Incorporated to allow the use and occupancy of lands and waters inside the project boundary for the purpose of establishing a commercial dredging operation at the previous location of Ace Sand. The project lands inside the project boundary are administered by National Park Service. The operation would remove a minimum of 12,000 cubic yards of sediment annually from an area 600-feet long by 100-feet wide (1.4 acres). A hydraulic cutterhead will suction the sedimented material from the bottom of the lake that has been deposited since construction of the project. The sediment will be dewatered with screens and gravity separation techniques within a dewatering device that will be moored on the

adjacent shoreline. Water from the dewatering operation will be returned to the project reservoir. The sediment will be temporarily stockpiled on an adjacent upland site that is located outside of the project boundary and will be transported off-site when sold.
