

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP25-54-000]

Gulf South Pipeline Company

Notice of Availability of the Environmental Assessment for the Proposed Parks Line Upgrade and Sorrento Station Project

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared an environmental assessment (EA) for the Parks Line Upgrade and Sorrento Station Project (Project), proposed by Gulf South Pipeline Company, LLC (Gulf South) in the above-referenced docket¹. Gulf South requests authorization to construct, own, operate, and maintain the Project located in St. Martin and Ascension Parishes, Louisiana. The proposed Project would allow Gulf South to restore the maximum allowable operating pressure (MAOP) along its existing pipeline system, enabling Gulf South to reliably deliver an additional 236,000 dekatherms per day of natural gas.

The EA assesses the potential environmental effects of the construction and operation of the Project in accordance with the requirements of the National Environmental Policy Act of 1969. FERC staff concludes that approval of the proposed Project would not constitute a major federal action significantly affecting the quality of the human environment.

¹ For tracking purposes under the National Environmental Policy Act, the unique identification number for documents relating to this environmental review is EAXX-019-20-000-1744214872.

The proposed Project includes the following facilities and activities:

Restoration of the Parks Line (Index 330) MAOP:

- replace 11 segments, equaling 4.55 miles of the Parks Line (Index 330) in St. Martin Parish with pipe that would permit the reestablishment of the original MAOP of the pipeline, allowing for the pipeline to operate at its certificated MAOP and reestablishing its full pressure of 1,000 pounds per square inch;
- replace and update an unmetered rural tap at milepost 54.93; and
- remove one inactive tap at milepost 52.76.

Construction of the Sorrento Compressor Station:

- construct the new Sorrento Compressor Station, which would house a 12,510 nominal horsepower Solar Mars 100 gas-fired compressor unit, auxiliary station equipment, and a new meter and regulator station;
- connect Gulf South's existing Index 270 pipeline through two new, approximately 0.29-mile-long, 30-inch-diameter discharge pipelines (Index 270-101 and -102 pipelines), which would terminate at the proposed Sorrento Mainline Valve; and
- construct approximately 1.06 miles of 20-inch-diameter pipeline (Index 270-103) to connect the new meter and regulator station to an inline tool receiver site, which would include a pig receiver, valve assembly, and security fencing.

The Commission mailed a copy of the *Notice of Availability* to federal, state, and local government representatives and agencies; elected officials; environmental and

public interest groups; Native American tribes; potentially affected landowners and other interested individuals and groups; and newspapers and libraries in the project area. The EA is only available in electronic format. It may be viewed and downloaded from the FERC's website (www.ferc.gov), on the natural gas environmental documents page (<https://www.ferc.gov/industries-data/natural-gas/environment/environmental-documents>). In addition, the EA may be accessed by using the eLibrary link on the FERC's website. Click on the eLibrary link (<https://elibrary.ferc.gov/eLibrary/search>), select "General Search" and enter the docket number in the "Docket Number" field, excluding the last three digits (i.e., CP25-54). Be sure you have selected an appropriate date range. For assistance, please contact FERC Online Support at FercOnlineSupport@ferc.gov or toll free at (866) 208-3676, or for TTY, contact (202) 502-8659.

The EA is not a decision document. It presents Commission staff's independent analysis of the environmental issues for the Commission to consider when addressing the merits of all issues in this proceeding. Any person wishing to comment on the EA may do so. Your comments should focus on the EA's disclosure and discussion of potential environmental effects, reasonable alternatives, and measures to avoid or lessen environmental impacts. The more specific your comments, the more useful they will be. To ensure that the Commission has the opportunity to consider your comments prior to making its decision on this project, it is important that we receive your comments in **Washington, DC on or before 5:00 pm Eastern Time on October 6, 2025.**

For your convenience, there are three methods you can use to file your comments to the Commission. The Commission encourages electronic filing of comments and has staff available to assist you at (866) 208-3676 or FercOnlineSupport@ferc.gov. Please carefully follow these instructions so that your comments are properly recorded.

- (1) You can file your comments electronically using the eComment feature on the Commission's website (www.ferc.gov) under the link to FERC Online. This is an easy method for submitting brief, text-only comments on a project;
- (2) You can also file your comments electronically using the eFiling feature on the Commission's website (www.ferc.gov) under the link to FERC Online. With eFiling, you can provide comments in a variety of formats by attaching them as a file with your submission. New eFiling users must first create an account by clicking on "eRegister." You must select the type of filing you are making. If you are filing a comment on a particular project, please select "Comment on a Filing"; or
- (3) You can file a paper copy of your comments by mailing them to the Commission. Be sure to reference the Project docket number (CP25-54-000) on your letter. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne

A. Reese, Secretary, Federal Energy Regulatory Commission, 12225
Wilkins Avenue, Rockville, MD 20852.

Filing environmental comments will not give you intervenor status, but you do not need intervenor status to have your comments considered. Only intervenors have the right to seek rehearing or judicial review of the Commission's decision. At this point in this proceeding, the timeframe for filing timely intervention requests has expired. Any person seeking to become a party to the proceeding must file a motion to intervene out-of-time pursuant to Rule 214(b)(3) and (d) of the Commission's Rules of Practice and Procedures (18 CFR 385.214(b)(3) and (d)) and show good cause why the time limitation should be waived. Motions to intervene are more fully described at <https://www.ferc.gov/how-intervene>.

Additional information about the project is available from the Commission's Office of External Affairs, at **(866) 208-FERC**, or on the FERC website (www.ferc.gov) using the eLibrary link. The eLibrary link also provides access to the texts of all formal documents issued by the Commission, such as orders, notices, and rulemakings.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, community organizations, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments,

or requests for rehearing, the public is encouraged to contact OPP at (202) 502-6595 or OPP@ferc.gov.

In addition, the Commission offers a free service called eSubscription which allows you to keep track of all formal issuances and submittals in specific dockets. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. Go to <https://www.ferc.gov/ferc-online/overview> to register for eSubscription.

Dated: September 5, 2025

Debbie-Anne A. Reese,

Secretary.
