It also helps the public understand our information collection requirements and provide the requested data in the desired format. We are especially interested in public comments addressing the following:

(1) Whether or not the collection of information is necessary for the proper performance of the functions of the agency, including whether or not the information will have practical utility;

(2) The accuracy of our estimate of the burden for this collection of information, including the validity of the methodology and assumptions used;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) How might the NPS minimize the burden of the collection on the respondents,

including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of response.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Abstract: Authorized by the NPS Organic Act, 54 U.S.C. 100101 et seq., and Public Health Service Act, 42 U.S. Code chapter 6A, the NPS Office of Public Health (OPH) is called upon by NPS leadership and others to conduct disease surveillance, respond to urgent outbreaks, and prevent illnesses within or associated with national parks. In some areas of the National Park System, State and local health departments may not have jurisdiction; even where State and local health departments do have jurisdiction, they may rely on the NPS for public health response on public lands.

This collection will allow the NPS OPH to conduct epidemiological investigations in response to public health events of concern, including:

- Incidents where three or more visitors, employees, or volunteers have similar symptoms or illnesses.
- Single reports of rare or reportable diseases.
- Incidents that result in death, cause serious injury or illness, and/or lead to overnight hospitalization.
- Wildlife encounters of concern such as bites, scratches, or attacks and wildlife

deaths that do not fit known patterns.

- Any additional illnesses of public health concern.

The information collected will be used to determine the agents, sources, modes of transmission, or risk factors so that effective prevention and control measures can be implemented.
