**SUPPLEMENTARY INFORMATION:**

**I. Background**

The Department of Labor, as part of the continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA’s estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (OSH Act) (29 U.S.C. 651 et seq.) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with a minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining said information (29 U.S.C. 657).

The following sections describe who uses the information collected under each requirement, as well as how they use it. The purpose of these requirements is to prevent

death and serious injuries among workers by ensuring that the derrick is not used to lift loads beyond its rated capacity and that all the ropes are inspected for wear and tear.

Paragraph (c)(1) requires that for permanently installed derricks a clearly legible rating chart must be provided with each derrick and securely affixed to the derrick.

Paragraph (c)(2) requires that for non-permanent installations the manufacturer must provide sufficient information from which capacity charts can be prepared by the derrick or at the jobsite office. The data on the capacity charts provide information to the workers to assure that the derricks are used as designed and not overloaded or used beyond the range specified in the charts.

Paragraph (f)(2)(i)(D) requires that warning or out of order signs must be placed on the derrick hoist while adjustments and repairs are being performed.

Paragraph (g)(1) requires employers to thoroughly inspect all running rope in use, and to do so at least once a month. In addition, before using rope that has been idle for at least a month, it must be inspected as prescribed by paragraph (g)(3) and a record prepared to certify that the inspection was done. The certification records must include the inspection date, the signature of the person conducting the inspection, and the identifier of the rope inspected. Employers must keep the certification records on file and available for inspection. The certification records provide employers, workers, and OSHA compliance officers with assurance that the ropes are in good condition. The Standard requires the disclosure of charts and inspection certification records if requested during an OSHA inspection.

## **II. Special Issues for Comment**

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the agency's functions to protect workers, including whether the information is useful;

- The accuracy of OSHA’s estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information, and transmission techniques.

### **III. Proposed Actions**

OSHA is requesting that OMB extend the approval of the information collection requirements contained in the Derricks Standard. The agency is requesting that the burden hours remain the same at 1,336 hours.

OSHA will summarize the comments submitted in response to this notice and will include this summary in the request to OMB to extend the approval of the information collection requirements.
