[Docket No. CP25-19-000]

Southern Star Central Gas Pipeline, Inc.; Notice of Availability of the Environmental Assessment for the Proposed Cedar Vale Compressor Station Project

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared an environmental assessment (EA) for the Cedar Vale Compressor Station Project (Project), proposed by Southern Star Central Gas Pipeline, Inc. (Southern Star) in the above-referenced docket.¹ Southern Star requests authorization to construct, own, operate, and maintain a new compressor station in Osage County, Oklahoma. According to Southern Star, the proposed Project would provide up to 98,000 dekatherms per day of incremental firm capacity in Southern Star's Market Area and approximately 35,000 dekatherms per day of incremental firm capacity in its Production Area, serving customers in Kansas and Missouri.

The EA assesses the potential environmental effects of the construction and operation of the Project in accordance with the requirements of the National Environmental Policy Act of 1969 (NEPA). FERC staff concludes that approval of the

proposed Project would not constitute a major federal action significantly affecting the quality of the human environment.

The Project would consist of the following facilities:

- a new 6,091-horsepower Solar Centaur 50 turbine compressor unit;
- approximately 1,028 feet of associated piping; and
- other appurtenant facilities including valves, tanks, control systems, fencing, and security equipment.

The Commission mailed a copy of the *Notice of Availability* to federal, state, and local government representatives and agencies; elected officials; environmental and public interest groups; Native American tribes; potentially affected landowners and other interested individuals and groups; and newspapers and libraries in the Project area. The EA is only available in electronic format.
