Abstract: Part I of the Federal Power Act (FPA)¹ authorizes the Commission to grant hydropower licenses and exemptions to citizens of the United States, or to any corporation organized under the laws of United States or any State thereof, or to any State or municipality. Holders of such licenses and exemptions construct, operate, and maintain dams, water conduits, reservoirs, power houses, transmission lines, or other project works necessary or convenient for the development and improvement of navigation and for the development, transmission, and

utilization of power across, along, from, or in any of the streams or other bodies of water over which Congress has jurisdiction. This jurisdiction stems from Congressional authority to regulate commerce with foreign nations and among the several States, or upon any part of the public lands and reservations of the United States.

FERC-500 and FERC-505 comprise applications and other information collection activities implemented under numerous regulations. Some of the regulations are relevant to both FERC-500 and FERC-505, and others are relevant only to FERC-500 or FERC-505. Effective October 4, 2021, information collection activities within FERC-500 are for projects with an installed capacity of more than 10 MW. Information collection activities within FERC-505 are for other smaller projects.

As required by OMB regulations at 5 CFR 1320.8(d), the Commission provided a 60-day notice of its renewal request in the Federal Register on July 23, 2025 (90 FR 34648). The public-comment period expired on September 22, 2025. No comments were received.

The following table lists information collection activities pertaining to applications and notices of intent. The table is organized as pairs of regulations that address, respectively, applicability and required contents of each activity.

Each of the “contents” regulations listed above requires information that assists the Commission in identifying the respondent and the type of proposed project. In addition, certain types of applications must include all⁴ or some⁵ of the following exhibits:

- Exhibit A is a description of the project.
- Exhibit B is a statement of project operation and resource utilization.
- Exhibit C is a proposed construction schedule for the project.
- Exhibit D is a statement of project costs and financing.

⁴ The following regulations require Exhibits A through G: 18 CFR 4.41, 4.51, 4.61, 4.71, 4.201(b)(1) and 4.201(b)(5).

- Exhibit F consists of general design drawings of the principal project works described under Exhibit A and supporting information used as the basis of design.
- Exhibit G is a map of the project.

No exhibits are required in a Notice of Intent to Construct Qualifying Conduit Hydropower Facilities under 18 CFR 4.401. However, the Notice of Intent must include:

Both information collections include an activity related to recreation signage (18 CFR 8.1 and 8.2) which is used to inform the public of appropriate uses at the project. FERC-500 includes an annual conveyance report (18 CFR 141.15) which must be submitted only if a conveyance of easements or rights-of-way across project lands, or a lease of project lands, has occurred in the previous year.
