Title: Fixed Guideway Capital Investment Grants (CIG) Program Section 5309

OMB Control Number: 2132-0561

Background: In accordance with the Paperwork Reduction Act (PRA) of 1995, the Federal Transit Administration (FTA) is requesting Office of Management and Budget (OMB) 3-year approval of an extension without change for a currently approved collection. The Federal Transit Administration (FTA) administers the discretionary Capital Investment Grants (CIG) grant program under 49 U.S.C. Section 5309 that provides funding for major transit capital investments including heavy rail, light rail, commuter rail, streetcar, bus rapid transit, and ferries. Three types of eligible projects are outlined in law: smaller scaled transit capital projects known as “Small Starts”; new fixed guideway transit systems and extensions to existing fixed guideway systems known as “New Starts”; and projects to improve overall system capacity in existing fixed guideway corridors, known as “Core Capacity”. The CIG program has a longstanding requirement that FTA evaluate proposed projects against a prescribed set of statutory criteria at specific points during the projects’ development including when they seek to enter a subsequent phase of the process or a construction grant agreement. In addition, FTA must report on its evaluations and ratings annually to Congress.

The current Federal Public Transportation Law, 49 USC 5309, has not changed the statutorily defined project justification and local financial commitment criteria that are the subject of this information collection. In addition, the statutorily required approval steps for projects seeking CIG funds have not changed. FTA will seek comment from stakeholders through the publication of a separate Federal Register Notice outside of the PRA process. In general, the information used by FTA for CIG project evaluation and rating should arise as a part of the normal project planning process.

Estimated Total Annual Respondents: 155

Estimated Annual Total Responses: 55,720

Estimated Annual Burden Hours on Respondents: 2,870,695

Frequency: Annually
