**SUPPLEMENTARY INFORMATION:**

PHMSA received a special permit request from Gulfstream LNG on September 17, 2025, seeking to waive certain requirements in the Federal pipeline safety regulations that would apply otherwise to the design, construction, and testing of a proposed LNG storage tank in Plaquemines Parish, Louisiana.

Gulfstream LNG is proposing to construct and operate gas treatment, liquefaction, LNG storage, truck loading, and marine facilities (collectively known as the Gulfstream LNG Project or the Project) for the purpose of liquefying domestic natural gas for export to foreign markets as LNG. The proposed project would include a membrane tank, to be used for LNG storage, with a nominal working volume of 200,000 cubic meters or 1,258,000 barrels. Gulfstream LNG seeks to waive the requirements of 49 CFR §§ 193.2101(a), 193.2301, and 193.2303, which incorporate by reference the 2001 edition of National Fire Protection Association (NFPA) 59A-2001, “Standard for the Production, Storage, and Handling of Liquefied Natural Gas (LNG),” for the design, construction, and testing of LNG facilities, including the design of LNG storage tanks. Specifically, Gulfstream LNG is applying for a special permit to authorize the design and construction

of a membrane containment tank system (membrane tank) in accordance with the 2023 edition of NFPA-59A, which is not incorporated by reference in 49 CFR Part 193.

The special permit request and the proposed special permit conditions for Gulfstream LNG's request are available for review and public comment in Docket No. PHMSA-2025-1073. PHMSA invites interested persons to review and submit comments in the docket on the special permit request and the proposed special permit conditions. Please submit comments on any potential safety, environmental, and other relevant considerations implicated by the special permit request. Comments may include relevant data.

Before issuing a decision on the special permit request, PHMSA will evaluate all comments received on or before the closing date. PHMSA will consider each relevant comment it receives in making its decision to grant or deny this special permit request.

Issued in Washington, D.C., on November 17,2025, under authority delegated in 49 CFR § 1.97.

**Linda Daugherty,**  
*Acting Associate Administrator for Pipeline Safety.*
