[Project No. 1256-089]

Loup River Public Power District

Notice of Availability of Environmental Assessment

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission or FERC) regulations, 18 C.F.R. Part 380, Commission staff reviewed Loup River Public Power District's application for a non-capacity amendment of license for the Loup River Hydroelectric Project No. 1256 and have prepared an Environmental Assessment (EA) for the project.¹ The licensee proposes to amend Articles 404 and 405 and one of the terms and conditions of the U.S. Fish and Wildlife Service's (FWS) Biological Opinion (BO), referred to as RPM1-TC1a, to provide for flows in the power canal during low flow events as well as greater operating flexibility under Article 405. The Loup River Project is located on the Loup and Platte Rivers, in Nance and Platte counties, Nebraska. The project does not occupy federal lands.

¹ The unique identification number for documents relating to this environmental review is EAXX-019-20-000-1753110756.

The EA contains Commission staff's analysis of the potential environmental effects of the proposed non-capacity amendment (proposed action), alternatives to the proposed action, and concludes that the proposed action, with staff-recommended measures, would not constitute a major federal action that would significantly affect the quality of the human environment.

The EA may be viewed on the Commission's website at <http://www.ferc.gov> using the "eLibrary" link. Enter the docket number (P-1256) in the docket number field to access the document.
