## POLICY JUSTIFICATION

### Denmark – Precision Guidance Kits

The Government of Denmark has requested to buy five thousand eight hundred thirty-two (5,832) M1156 Precision Guidance Kits (PGK). Also included are ancillary items; compatibility testing; firing tables; technical assistance; technical data; new equipment training; and other related elements of logistics and program support. The estimated total cost is \$85 million.

This proposed sale will support the foreign policy goals and national security objectives of the United States by improving the security of a NATO Ally that is a force for political stability and economic progress in Europe.

The proposed sale will improve Denmark's capability to meet current and future threats by providing precision capability equipment and will increase first strike accuracy in its brigades. Denmark will have no difficulty absorbing these articles and services into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Northrop Grumman, located in Minneapolis, MN. The purchaser typically requests offsets. Any offset agreement will be defined in negotiations between the purchaser and the contractor.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Denmark.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Notice of Proposed Issuance of Letter of Offer  
Pursuant to Section 36(b)(1)  
of the Arms Export Control Act

Annex  
Item No. vii

(vii) Sensitivity of Technology:

1. The M1156A1 Precision Guidance Kit (PGK) is a cannon artillery fuze which uses the Global Positioning System (GPS) to increase the delivery accuracy of standard 155mm high explosive ammunition. The NA37 M1156A1 includes M-code capability. It is also a Height of Burst (HOB) fuze, which uses a proximity sensor to cause the round to burst in the air over the enemy, increasing lethality against the target.
2. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.
3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in development of a system with similar or advanced capabilities.
4. A determination has been made that Denmark can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in the furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.
5. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of Denmark.
