Abstract: This request for clearance of the Juvenile Facility Census Program (JFCP) will combine two previously, separately cleared data collections: the Census of Juveniles in Residential Placement (CJRP, OMB # 1121-0218) and the Juvenile Residential Facility Census (JRFC, OMB # 1121-0219). The JFCP collects information from all secure and nonsecure residential placement facilities that house persons younger than age 21 who are being held as a result of some contact with the juvenile justice system for a law violation. This encompasses both status offenses and delinquency offenses and includes youth who are either temporarily detained by the court or committed after adjudication for an offense. The JFCP consolidates the content of the CJRP and JRFC into a single, unified program. It collects general information on facility characteristics and the number of youth housed, and includes two rotating content modules that are administered separately during a two-year collection cycle: the Youth Population module and the Facility Operations module. The Youth Population module collects detailed information on individual youth housed in facilities, including demographic details, placement characteristics, and length of stay. The Facility Operations module collects information on resident services, facility features, and operations. The information gathered in these national collections will be used in published reports and statistics. The reports will be made

- available to the U.S. Congress, Executive Office of the President, practitioners, researchers, students, the media, others interested in juvenile residential facilities, and the general public via the OJP agency websites. The two data collections are being consolidated to attain cost savings and reduce respondent burden.
5. **Obligation to Respond: Voluntary.**
  6. **Total Estimated Number of Respondents:** The total estimated respondents is 1,636 for each module for each year.
  7. **Estimated Time per Respondent:** It takes an average of 6 hours to complete the JFCP. The total burden is 9,816, including the two rotating content modules that are administered separately during a two-year collection cycle. The Youth Characteristics module takes an average of 4 hours to complete. The total burden for the Youth Characteristics module is 6,544 hours. The Facility Operations module takes an average of 2 hours to complete. The total burden for the Facility Operations module is 3,272 hours.
  8. **Frequency:** The JFCP is a biennial data collection with two content modules administered separately during a two-year collection cycle.
  9. **Total Estimated Annual Time Burden:** The average annual burden is 4,908 or 9,816 total hours for the two-year collection cycle.
  10. **Total Estimated Annual Other Costs Burden:** The estimated annual cost for JFCP is \$1,142,115. The estimated cost for one collection cycle is \$2,284,230.
