1. Description of Request: The applicant requests a license amendment to allow for the construction of a 4-foot-high flood wall on top of the existing left bank retaining wall to prevent flooding of the powerhouse area during high flow events. The applicant is not proposing any changes to project operation and the proposed work would have no effect on the minimum flow release of the project. The

applicant would implement best management practices, as necessary, to control the erosion of soil and the resulting sedimentation.
