Abstract of information available

Human remains representing, at least, one individual have been identified. The 73

associated funerary objects are 41 glass beads, 18 bone disk beads, nine shell disk beads, one spherical bead of unknown material, three copper buttons, and one fragment of a likely bone tool. The fragmentary human remains consist of one child's deciduous canine. The human remains and associated funerary objects were excavated by University of Oregon archaeologists in 1960 at the site designated as YA-1 in Yamhill County, Oregon, approximately five miles southwest of the town of McMinnville. Additional human remains from the site were repatriated to the Confederated Tribes of Grand Ronde in 1999. The present remains and belongings were discovered during a subsequent collections move by the Museum. The Yamhill County area is in the historic territory of Kalapuya peoples.

Cultural affiliation

Based on the information available and the results of consultation, cultural affiliation is reasonably identified by the geographical location or acquisition history of the human remains and associated funerary objects described in this notice.
