**SUPPLEMENTARY INFORMATION:** Under part 211 of title 49 Code of Federal Regulations (CFR), this document provides the public notice that by letter received October 17, 2025, UPRR petitioned FRA for an extension of a waiver of compliance from certain provisions of the Federal railroad safety regulations contained at 49 CFR part 215 (Railroad Freight Car Safety Standards) and 232 (Brake System Safety Standards for Freight and Other Non-Passenger Trains and Equipment; End-of-Train Devices). FRA assigned the petition Docket Number FRA-2007-28340.

UPRR requests continued relief from part 215 and § 232.205(a)(1), *Class I brake test – initial terminal inspection*, to move freight cars received in interchange from Kansas City Southern de Mexico at the West Rail International Bridge, located west of Brownsville, Texas, to Olmito, Texas. The required inspections are conducted at the Olmito yard, which is 5.65 miles from the bridge.

In support of its petition, UPRR stated that the Olmito yard operations are “aligned with current Customs/Border Patrol agents and other security[-]related agencies facilitating necessary inspection and testing of equipment” received in interchange. Further, UPRR stated that the relief avoids “unnecessary congestion at the point of interchange while allowing a safer environment for railroad personnel to conduct the required inspections of rail equipment.” In addition, UPRR wrote that the relief will reduce opportunities for contraband or individuals to unlawfully enter the United States on rail equipment.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at [www.regulations.gov](http://www.regulations.gov).
