General Description of Collection: The FDIC’s policy statement on Qualifications for Failed Bank Acquisitions provides guidance to private capital investors interested in acquiring or investing in failed insured depository institutions regarding the terms and conditions for such investments or acquisitions. The information collected pursuant to the policy statement allows the FDIC to evaluate, among other things, whether such investors (and their related interests) could negatively impact the Deposit Insurance Fund, increase resolution costs, or operate in a manner that conflict with statutory safety and soundness principles and compliance requirements. There is no change in the method or substance of the collection. The estimated burden remains unchanged from the previous submission.

2. Title: Stress Testing Recordkeeping and Reporting.

OMB Number: 3064-0189.

General Description of Collection: The FDIC has issued a rule requiring periodic stress testing by FDIC-supervised institutions having more than \$250 billion in total assets, consistent with changes made by section 401 of the Economic Growth, Regulatory Relief, and Consumer Protection Act (EGRRCPA). Section 165(i)(2) of the Dodd-Frank Act requires each primary Federal regulator to issue consistent and comparable regulations to (1) ensure that certain financial companies conduct stress tests, (2) establish the form and content of the required reports of such stress tests, and (3) require companies to publish a summary of the stress test results. As originally enacted, section 165(i)(2)(C) applied to all IDIs with average total consolidated assets of \$10 billion or greater, required such IDIs to conduct annual stress tests, and required the use of three scenarios: baseline, adverse, and severely adverse. Consistent with the requirements of section 165(i)(2)(C), as originally enacted, the FDIC published its final rule implementing section 165(i)(2) on October 15, 2012. The requirements under 12 CFR part 325 applied to FDIC-supervised IDIs with average total consolidated assets of \$10 billion or greater. The EGRRCPA, enacted on May 24, 2018, amended certain aspects of the company-run stress-testing requirements in section 165(i)(2) of the Dodd-Frank Act. The EGRRCPA amendments to the section 165(i)(2) stress testing requirements became effective eighteen months after enactment. The aspects of 12 CFR part 325 that constitute an information collection are those that require a banking organization to (1) file stress test reports to be filed periodically with the FDIC and the Board of Governors of the Federal Reserve System in the time, manner, and form specified by the FDIC (12 CFR 325.6); (2) establish and maintain a system of controls, oversight, and documentation, including policies and procedures that describe the covered bank's stress test practices and methodologies, as well as processes for updating such bank's stress test practices, as well as specific calculations that must be made by the banking organization during its

stress tests (12 CFR 325.5); and (3) publish a summary of the results of its stress tests (12 CFR 325.7). On May 17, 2012, the FDIC, the Office of the Comptroller of the Currency, and the Board of Governors of the Federal Reserve published the 2012 Interagency Guidance on the use of stress testing as a means to better understand the range of a banking organization's potential risk exposures. The guidance is intended for IDIs with total consolidated assets of more than \$10 billion and provides an overview of how a banking organization should structure its stress testing activities to ensure they fit into the banking organization's overall risk management program. The purpose of the guidance is to outline broad principles for a satisfactory stress testing framework and describe the manner in which stress testing should be used, that is as an integral component of risk management applicable at various levels of aggregation within a banking organization as well as a tool for capital and liquidity planning. The 2012 Interagency Guidance recommends that IDIs stress test in coordination with their "overall strategy and annual planning cycles and assess and review their stress testing frameworks at least once a year to ensure that stress testing coverage is comprehensive, tests are relevant and current, methodologies are sound, and results are properly considered." The aspects of the 2012 Interagency Guidance that constitute an information collection are the provisions that state a banking organization should (1) have a stress testing framework that includes clearly defined objectives, well designed scenarios tailored to the banking organization's business and risks, well documented assumptions, conceptually sound methodologies to assess potential impact on the banking organization's financial condition (Section II); (2) maintain an internal summary of test results to document at a high level the range of its stress testing activities and outcomes, as well as proposed follow-up actions (Section III); and (3) have policies and procedures for a stress testing framework (Section VI). There has been no change in the substance or methodology of this information collection. The 774-hour increase in total estimated annual burden from 5,726 hours in 2023 to 6,500

hours currently is due to the doubling of annual responses to ICs 1-3 and the increased number of respondents to IC 6 and is attenuated by the decreased number of respondents to ICs 4 and 5.

Request for Comment

Comments are invited on (a) whether the collection of information is necessary for the proper performance of the FDIC's functions, including whether the information has practical utility; (b) the accuracy of the estimates of the burden of the information collection, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. All comments will become a matter of public record.
