(viii) Date Report Delivered to Congress: **April 30, 2025**

\* as defined in Section 47(6) of the Arms Export Control Act.

## POLICY JUSTIFICATION

### India – Indo-Pacific Maritime Domain Awareness

The Government of India has requested to buy SeaVision software (including requested software enhancements); Technical Assistance Field Team (TAFT) training; remote software and analytic support; access to SeaVision documentation; and other related elements of logistics and program support. The estimated total cost is \$131 million.

This proposed sale will support the foreign policy and national security objectives of the U.S. by helping to strengthen the U.S.-Indian strategic relationship and to improve the security of a major defense partner which continues to be an important force for political stability, peace, and economic progress in the Indo-Pacific and South Asia regions.

The proposed sale will improve India's capability to meet current and future threats by bolstering its maritime domain awareness, analytical capabilities, and strategic posture. India will have no difficulty absorbing these articles and services into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Hawkeye 360, located in Herndon, VA. At this time, the U.S. Government is not aware of any offset agreement proposed in connection with this potential sale. Any offset agreement will be defined in negotiations between the purchaser and the contractor.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to India.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Notice of Proposed Issuance of Letter of Offer  
Pursuant to Section 36(b)(1)  
of the Arms Export Control Act

Annex  
Item No. vii

(vii) Sensitivity of Technology:

1. SeaVision is a web-based maritime situational awareness tool that enables users to view and share a broad array of maritime information to improve maritime operations, increase maritime security, and build partnerships within the maritime community. As part of its alignment with the Indo-Pacific Maritime Domain Awareness (IPMDA) initiative, SeaVision provides access to available commercial data sources, including commercial radio frequency (RF), Automatic Identification System (AIS), imagery, and ship registry data. This sale also offers Technical Assistance Field Team (TAFT) training, remote software and analytic support, and comprehensive SeaVision documentation to further enhance maritime domain awareness and cooperation.
2. The highest level of classification of defense articles, components, and services included in this potential sale is UNCLASSIFIED.
3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce system effectiveness or be used in the development of a system with similar or advanced capabilities.
4. A determination has been made that India can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.
5. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of India.
