Washington, DC 20301-2800

May 2, 2025

The Honorable Mike Johnson
Speaker of the House
U.S. House of Representatives
H-209, The Capitol
Washington, DC 20515

Dear Mr. Speaker:

Pursuant to the reporting requirements of Section 36(b)(1) of the Arms Export Control Act, as amended, we are forwarding herewith Transmittal No. 25-14, concerning the Navy's proposed Letter(s) of Offer and Acceptance to the Government of Norway for defense articles and services estimated to cost \$370.9 million. We will issue a news release to notify the public of this proposed sale upon delivery of this letter to your office.

Sincerely,

A handwritten signature in black ink, appearing to read "M. F. Miller", is positioned above the printed name.

Michael F. Miller
Director

- (viii) Date Report Delivered to Congress: **May 2, 2025**

* as defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

Norway – AIM-9X Block II Tactical Missiles

The Government of Norway has requested to buy three hundred (300) AIM-9X Block II Sidewinder tactical missiles; two (2) AIM 9X Block II special air training missiles (NATM); twenty-four (24) AIM 9X Block II captive air training missiles (CATM); twenty (20) AIM 9X Block II Tactical Guidance Units; and twenty (20) AIM 9X Block II CATM Guidance Units. The following non-MDE items will also be included: dummy air training missiles; missile containers; software; training; support equipment; spare and repair parts; publications and technical documentation; transportation; U.S. Government and contractor engineering, technical, and logistical support services; and other related elements of logistics and program support. The estimated total program cost is \$370.9 million.

This proposed sale will support the foreign policy goals and national security objectives of the U.S. by improving the security of a NATO Ally that is a force for political stability and economic progress in Europe.

The proposed sale will improve Norway's capability to meet current and future threats by ensuring aviation forces' interoperability with the U.S. and other NATO members. Norway will have no difficulty absorbing these weapons into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be RTX Corporation, located in Tucson, AZ. At this time, the U.S. Government is not aware of any offset agreement proposed in connection with this potential sale. Any offset agreement will be defined in negotiations between the purchaser and the contractor.

Implementation of the proposed sale will require the assignment of three U.S. Government and three contractor representatives to Norway on a temporary basis in conjunction with program technical oversight and support requirements.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Notice of Proposed Issuance of Letter of Offer
Pursuant to Section 36(b)(1)
of the Arms Export Control Act

Annex
Item No. vii

(vii) Sensitivity of Technology:

1. The AIM-9X Block II Sidewinder missile represents a substantial increase in missile acquisition and kinematics performance over the AIM-9M and replaces the AIM-9X Block I missile configuration. The missile includes a high off-boresight seeker, an enhanced countermeasure rejection capability, a low drag/high angle of attack airframe, and the ability to integrate the Helmet Mounted Cueing System. The most current AIM-9X Block II operational flight software developed for all international partners, which is authorized by U. S. Government export policy, provides fifth-generation infrared missile capabilities such as lock-on-after-launch, Weapons Data Link, surface attack, and surface launch. No software source code or algorithms will be released.
2. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.
3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce system effectiveness or be used in the development of a system with similar or advanced capabilities.
4. A determination has been made that Norway can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.
5. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of Norway.
