(iii) Description: On November 2, 2023, Congress was notified by congressional certification transmittal number 23-63 of the possible sale, under Section 36(b)(1) of the Arms Export Control Act, of additional services, as indicated below, that were added to a previously implemented case whose value was under the congressional notification threshold. The original FMS case, valued at \$28 million, included a Bell Contractor Logistics Support (CLS) and Field Service Representative (FSR) contract. This notification was for the combined CLS and FSR maintenance support for the following Bell aircraft: three (3) 407 variants, 206B3, OH-58A/C Kiowa, Huey II, and 505. The following was also included: United States (U.S.) Government and contractor engineering, technical and logistics support services; studies and surveys; and other related elements of logistics and program support. The estimated total cost was \$300 million. There was no Major Defense Equipment (MDE) associated with this sale.

This transmittal notifies the addition of the following non-MDE items: Contractor Logistics Support (CLS) and Field Service Representative (FSR) support for all variations of the Bell 412 aircraft. The estimated total value of the new items is \$200 million, resulting in a non-MDE and total case value increase of \$200 million to \$500 million. No MDE will be associated with this sale.

(iv) Significance: The proposed services will support the Iraq Army Aviation Command's rotary wing program to meet current and future threats by enhancing the strength of its homeland defense.
