*Title:* Stress Testing Rules for National Banks and Federal Savings Associations.

*OMB Control No.:* 1557-0343.

*Type of Review:* Regular.

*Affected Public:* Businesses or other for-profit.

*Description:* The Annual Stress Test rule<sup>1</sup> implemented Section 165(i) of the Dodd-Frank Wall Street Reform and Consumer Protection Act<sup>2</sup> (“Dodd-Frank Act”) which requires certain companies to conduct stress tests. As enacted by the Dodd-Frank Act, national banks and Federal savings associations with total consolidated assets of more than \$10 billion were required to conduct annual stress tests and comply with

reporting and disclosure requirements under the rule. The reporting templates for institutions with total consolidated assets of over \$50 billion were finalized in 2012.<sup>3</sup>

Section 165(i)(2) of the Dodd-Frank Act requires certain financial companies, including national banks and Federal savings associations, to conduct annual stress tests<sup>4</sup> and requires the primary financial regulatory agency<sup>5</sup> of those financial companies to issue regulations implementing the stress test requirements.<sup>6</sup>

Under section 165(i)(2), a covered institution was required to submit to the Board of Governors of the Federal Reserve System (Board) and to its primary financial regulatory agency a report at such time, in such form, and containing such information as the primary financial regulatory agency may require.<sup>7</sup>

The Economic Growth, Regulatory Relief, and Consumer Protection Act (EGRRCPA), enacted on May 24, 2018, amended certain aspects of the company-run stress testing requirement in section 165(i)(2) of the Dodd-Frank Act.<sup>8</sup> Specifically, section 401 of EGRRCPA raises the minimum asset threshold for financial companies covered by the company-run stress testing requirement from \$10 billion to \$250 billion in total consolidated assets; revises the requirement for banks to conduct stress tests “annually” and instead requires them to conduct stress tests “periodically”; and no longer requires the OCC to provide an “adverse” stress-testing scenario, thus reducing the number of required stress test scenarios from three to two.
