The Honorable Mike Johnson  
Speaker of the House  
U.S. House of Representatives  
H-209, The Capitol  
Washington, DC 20515

Dear Mr. Speaker:

On February 28, 2025, the Secretary of State, pursuant to section 36(b) of the Arms Export Control Act, as amended, determined that an emergency exists which requires the immediate sale of the defense articles and defense services identified in the attached transmittals to the Government of Israel through the Foreign Military Sales process, including any further amendment specific to costs, quantity, or requirements occurring within the duration of circumstances giving rise to this emergency sale.

Please find attached (Tab 1) the Secretary of State Determination and Justification waiving the congressional review requirements under Section 36(b)(1) and 36(b)(5)(C) of the Arms Export Control Act (AECA), as amended for the attached lists of transmittals of proposed Letters of Offer and Acceptance to the Government of Israel. The determination and detailed justification are a part of each transmittal. We will issue a news release to notify the public of this proposed sale upon delivery of this letter to your office.

Sincerely,

A handwritten signature in black ink, appearing to read "M.F. Miller".

(U) MEMORANDUM OF JUSTIFICATION  
FOR EMERGENCY ARMS TRANSFERS TO ISRAEL UNDER SECTION 36(b)(1) OF  
THE ARMS EXPORT CONTROL ACT

(U) On October 7, Hamas launched the worst attack on Israel since the 1973 Yom Kippur War, firing thousands of rockets, striking civilians and locations as far as Tel Aviv and Jerusalem. Hamas gunmen crossed into Israel, entering towns and communities as far as 15 miles from Gaza, slaughtering men, women, and children. More than 230 hostages were taken and dragged back into Gaza, including U.S. citizens. Hamas' act of terrorism has claimed the lives of nearly 1,200 in Israel, including at least 31 U.S. citizens, and wounded thousands more. The attack was the single deadliest day for the Jewish people since the Holocaust, and it was reminiscent of the worst rampages of ISIS. The following day, the Government of Israel formally declared war on Hamas in accordance with its Basic Law.

(U) Israel has the right to defend itself, and the United States strongly supports Israel taking necessary action to defend its country and protect its people from Hamas terrorists, consistent with international law, including the law of war. The Department of State and the Department of Defense are coordinating with Israeli partners to meet their military requirements and ensure Israel has what it needs to continue to defend itself, its people, and U.S. citizens living, working, and traveling in Israel.

(U) The United States' commitment to Israel's security is ironclad, which is reflected in decades of close political-military dialogues and high-level defense policy exchanges. The historic ten-year U.S.-Israel Memorandum of Understanding to provide Israel with \$38 billion in security assistance is a bulwark against regional threats. Should hostilities resume, Israel will need urgent and substantial support to respond to the immediate threat raised by Hamas' failure to uphold the terms of the ceasefire. Forced to respond to a resurgent Hamas, Israel must replenish stocks of key defense articles to fight and destroy Hamas, maintain its Qualitative Military Edge in the region, and continue to deter broader-scale regional conflict.

(U) It is essential to the United States' national security interest to swiftly provide Israel with the military equipment and arms required to defend itself and reinforce deterrence against other significant regional threats. These threats are very likely to increase should hostilities resume. Israel has communicated an urgent requirement for air-to-ground munitions and D9 bulldozers. The urgency of Israel's requirement has been validated by the Department of Defense in consultation with the Department of State. Should hostilities resume, we anticipate Israel will recommence its military operations in Gaza in the near-term. In order to effectively do so and ensure it is prepared for any other attacks, it has an urgent and ongoing need for these defense articles. The immediacy of the challenge at hand requires overcoming the statutory 15-day Congressional Notification timeline to expedite transfers to Israel.

(U) Further, over the 15 months between Hamas' October 7 attack and implementation of the ceasefire, Israel has faced attacks from Hizballah in Lebanon, the Houthis in Yemen, Iranian Aligned Militia Groups in Iraq and Syria, and two direct ballistic attacks from Iran. With the resumption of hostilities, such threats will likely increase and Israel remains at urgent risk of extremists in Lebanon, Iraq, Syria, and Yemen exploiting the resumption of hostilities.

(U) For the reasons cited above, an emergency exists requiring immediate provision of these defense articles to Israel in the national security interest of the United States. These transfers, through Foreign Military Sales, will provide Israel as soon as possible with defense articles that are necessary to allow it to defend itself in its war with Hamas as well as sending a strong, unwavering message that the United States will stand by and support Israel as it continues its fight against Hamas and other regional threats. The Secretary of State, therefore, has certified an emergency exists under sections 36(b)(1) of the Arms Export Control Act, 22 U.S.C. 2776, thereby waiving the congressional review requirement of that provision.

## POLICY JUSTIFICATION

### Israel – Munitions and Munitions Support

The Government of Israel has requested to buy thirty-five thousand five hundred twenty-nine (35,529) MK 84 or BLU-117 General Purpose (GP) bomb bodies, or a combination of both; and four thousand (4,000) I-2000 Penetrator warheads. The following non-MDE items will also be included: spare parts, consumables, accessories, and repair and return support; transportation support; U.S. Government and contractor engineering, technical, and logistics support services; and other related elements of logistics and program support. The estimated total cost is \$2.04 billion.

The Secretary of State has determined and provided detailed justification that an emergency exists that requires the immediate sale to the Government of Israel of the above defense articles (and defense services) in the national security interests of the U.S., thereby waiving the Congressional review requirements under Section 36(b) of the Arms Export Control Act, as amended.

The U.S. is committed to the security of Israel, and it is vital to U.S. national interests to assist Israel to develop and maintain a strong and ready self-defense capability. This proposed sale is consistent with those objectives.

The proposed sale will improve Israel's capability to meet current and future threats, strengthen its homeland defense, and serve as a deterrent to regional threats. Israel will have no difficulty absorbing this equipment into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The prime contractors will be General Dynamics, located in Garland, TX; Ellwood National Forge Company, located in Irvine, PA; and McAlester Army Ammunition Plant, located in McAlester, OK. There is a possibility that a portion of this procurement will come from U.S. stock. At this time, the U.S. Government is not aware of any offset agreement proposed in connection with this potential sale. Any offset agreement will be defined in negotiations between the purchaser and the contractor.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Israel.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Notice of Proposed Issuance of Letter of Offer  
Pursuant to Section 36(b)(1)  
of the Arms Export Control Act

Annex  
Item No. vii

(vii) Sensitivity of Technology:

1. The MK 84 General Purpose (GP) bomb is a 2,000-pound, free-fall, unguided, low-drag weapon. The MK-84 is designed for soft, fragment sensitive targets and is not intended for hard targets or penetrations. The explosive filling is usually tritonal, though other compositions have sometimes been used.
2. The BLU-109 bomb is a 2,000-pound, free-fall, unguided, low-drag, hard target penetration warhead designed to penetrate hardened structures before detonating.
3. The BLU-117 GP bomb is a 2,000-pound, free-fall, unguided, high and low-drag weapon equivalent to the MK-84 but slightly differs in explosive filler or manufacturer details.
4. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.
5. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce system effectiveness or be used in the development of a system with similar or advanced capabilities.
6. A determination has been made that Israel can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.
7. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of Israel.
