*Proposed Collection Title:* NCI Genomic Data Commons (GDC) Data Submission Request Form, 0925- 0752, Expiration Date 04/30/2026, EXTENSION. National Cancer Institute (NCI), National Institutes of Health (NIH).

*Need and Use of Information Collection:* The purpose of the NCI Genomic Data Commons (GDC) Data Submission Request Form is to continue to provide a vehicle for investigators to request the submission of their cancer genomic data into the GDC in support of data sharing. The purpose is also to provide a mechanism for the GDC Data Submission Review Committee to review and assess the data submission request for applicability to the GDC mission. The scope of the form involves obtaining information from investigators that: 1) would like to submit data about their study into the GDC, 2) are affiliated with studies that adhere to GDC data submission conditions. The benefits of the collection are that it provides the needed information for investigators to understand the types of studies and data that the GDC supports and that it provides a standard mechanism for the GDC to assess incoming data submission requests. The only change requested in this Extension is a reduction in the number of respondents from 200 to 100, resulting in a reduction in the total annual burden hours from 50 to 25. There are no other substantive changes to this submission other than the cost-of-living changes to the federal and labor costs.

OMB approval is requested for 3 years. There are no costs to respondents other than their time. The total estimated annualized burden hours are 25 hours.
