**SUPPLEMENTARY INFORMATION:** The NRC published notices of opportunity for public comment on this RIS in the *Federal Register* (85 FR 17770 and 87 FR 35798) on March 31, 2020 and June 13, 2022, respectively. The agency received comments from seven commenters. The staff considered all comments, which resulted in the publication of the updated draft RIS on April 18, 2025 (ADAMS under Accession No. ML25083A260). Since the publication of the updated draft RIS on April 18, 2025, and a public meeting on April 28, 2025, staff received additional feedback from licensees regarding the need to address circumstances where results from the Department of Homeland Security’s Systematic Alien Verification for Entitlements program may indicate that an individual is not employment eligible, but where they are still authorized to conduct business. To address these concerns, the staff added an additional footnote to the RIS (Footnote 2 in the final draft) as well as provided a clarifying paragraph for

instances where a licensee may identify other methods for validation by “evaluating an accumulation of information.” This includes situations where licensees need to manage exigent circumstances, permitting access through other means available in accordance with NRC regulations.

The evaluation of these comments and the resulting changes to the RIS are discussed in a publicly available document found in ADAMS under Accession No. ML25155A903.

RIS 2026-01, “Personnel Access Authorization Requirements for Non-Immigrant Foreign Nationals Working at Nuclear Power Plants,” is available in ADAMS under Accession No. ML25155B213.
