[Project No. 2237-036]

Georgia Power Company; Notice of Availability of Environmental Assessment

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission or FERC) regulations, 18 CFR Part 380, Commission staff reviewed Georgia Power Company's application for non-project use of project lands and waters to establish a commercial dredging operation at the Morgan Falls Hydroelectric Project No. 2237 and have prepared an Environmental Assessment (EA) for the project.¹ The licensee proposes to allow River Sand Incorporated to use and occupy project lands and waters in order to establish a commercial dredging operation inside the project boundary at the previous location of Ace Sand. The Morgan Falls project is located on the Chattahoochee River and partially occupies federal lands managed by the National Park Service.

The EA contains Commission staff's analysis of the potential environmental effects of the proposed commercial dredging operation, alternatives to the proposed action, and concludes that the proposed commercial dredging operation, with appropriate environmental protective measures, would not constitute a major federal action that would significantly affect the quality of the human environment.
