## **II. Legal Basis**

FMCSA has authority under 49 U.S.C. 31136(e) and 31315(b) to grant exemptions from Federal Motor Carrier Safety Regulations (FMCSRs). FMCSA must publish a notice of each exemption request in the Federal Register (49 CFR 381.315(a)). The Agency must provide the public an opportunity to inspect the information relevant to the application, including the applicant’s safety analysis . The Agency must provide an opportunity for public comment on the request.

The Agency reviews the application, safety analyses, and public comments submitted and determines whether granting the exemption would likely achieve a level of safety equivalent to, or greater than, the level that would be achieved absent such exemption, pursuant to the standard set forth in 49 U.S.C. 31315(b)(1). The Agency must publish its decision in the Federal Register (49 CFR 381.315(b)). If granted, the notice will identify the regulatory provision from which the applicant will be exempt, the

effective period, and all terms and conditions of the exemption (49 CFR 381.315(c)(1)). If the exemption is denied, the notice will explain the reason for the denial (49 CFR 381.315(c)(2)). The exemption may be renewed (49 CFR 381.300(b)).

### **III. Applicant's Request**

Liberty seeks an exemption from the requirement in 49 CFR 393.25(e) that all exterior lamps (both required lamps and any additional lamps) be steady burning, except for turn signal lamps, hazard warning signal lamps, school bus warning lamps, amber warning lamps or flashing warning lamps on tow trucks and CMVs transporting oversized loads, and warning lamps on emergency and service vehicles authorized by State or local authorities.

Liberty asserts that using the Intellistop module, which pulses the rear clearance, identification, and brake lamps from low-level lighting intensity to high-level lighting intensity 4 times in 2 seconds when the brakes are applied rather than providing steady burning lamps during the first 2 seconds, would enhance rear signal systems. Liberty submits that pulsing the rear brake lamps of a CMV may significantly increase visibility and reduce the frequency of rear-end crashes, and thus would maintain a level of safety that is equivalent to, or greater than, the level that the CMV would achieve without the requested exemption.

On October 7, 2022, FMCSA denied Intellistop's application for an industry-wide exemption (87 FR 61133) to allow all motor carriers to operate CMVs equipped with Intellistop's module. FMCSA noted that the decision did not preclude individual motor carriers from seeking an exemption from 49 CFR 393.25(e) to purchase, install, and use Intellistop's device subject to terms and conditions to allow sufficient monitoring of the use of the device. Consistent with the October 7, 2022, decision, the Agency seeks public comment on Liberty's carrier-specific exemption application.

A copy of Liberty's application and supporting materials is available for review in the docket for this notice.

#### **IV. Request for Comments**

In accordance with 49 U.S.C. 31315(b), FMCSA requests public comment from all interested persons on Liberty's application for an exemption from the requirements of 49 CFR 393.25(e).

All comments received before the close of business on the comment closing date will be considered and will be available for examination in the docket at the location listed under the Addresses section of this notice. Comments received after the comment closing date will be filed in the public docket and may be considered to the extent practicable. In addition to late comments, FMCSA will also continue to file, in the public docket, relevant information that becomes available after the comment closing date. Interested persons should continue to examine the public docket for new material.
