Abstract: Under the Uniform Federal Crime Reporting Act of 1988, 34 U.S.C. § 41303; the DOJ's authority regarding the acquisition, preservation, and exchange of identification records and information, 28 U.S.C. § 534; the USA Patriot Improvement and Reauthorization Act of 2005, Public Law 109-177, 120 Stat. 193; the William Wilberforce Trafficking Victims

Protection Reauthorization Act of 2008, 34 U.S.C. § 41309; and the Hate Crimes Statistics Act, 34 U.S.C. § 41305, this collection requests incident data from federal, state, local, tribal, and territorial LEAs in order for the FBI's Uniform Crime Reporting (UCR) Program to serve as the national clearinghouse for the collection and dissemination of incident data. The traditional Summary Reporting System (SRS), managed by the FBI's UCR Program since the 1930s, includes 10 crimes and employs the Hierarchy Rule (i.e., in a multiple-offense incident, only the most serious crime is reported). In contrast, NIBRS includes 28 offense categories made up of 71 specific crimes (i.e., Group A offenses) and allows LEAs to report up to 10 of those offenses associated with an incident. For each of these offenses, LEAs collect administrative, offense, property, victim, offender, and arrestee information. Arrest data only are reported for an additional 10 Group B offenses. The level of detail is the most significant difference between NIBRS and SRS and the NIBRS data submitted to the FBI's UCR Program are generated as a byproduct of a LEA's records management system.
