Project No. 2459-279

Lake Lynn Generation, LLC

Notice Of Availability of Environmental Assessment

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR Part 380, the Office of Energy Projects has reviewed the application for a new license to continue to operate and maintain the Lake Lynn Hydroelectric Project No. 2459 (project). The 51.2-megawatt project is located on the Cheat River, near the City of Morgantown, in Monongalia County, West Virginia, and near the Borough of Point Marion, in Fayette County, Pennsylvania. Commission staff has prepared an Environmental Assessment (EA) for the project.¹

The EA contains the staff's analysis of the potential environmental effects of the project and concludes that relicensing the project, with appropriate environmental protective measures, would not constitute a major federal action that would significantly affect the quality of the human environment.

¹ For tracking purposes under the National Environmental Policy Act, the unique identification number for documents relating to this environmental review is EAXX-019-20-000-1740488411.

The Commission provides all interested persons with an opportunity to view and/or print the EA via the Internet through the Commission's Home Page (<http://www.ferc.gov/>), using the "eLibrary" link. Enter the docket number, excluding the last three digits in the docket number field, to access the document.
