This information collection request contains:

(1) *OMB No.*: 1910-5179;

(2) *Information Collection Request Titled*: Energy and Jobs Survey;

(3) *Type of Review*: Revision;

(4) *Purpose*: The nature of energy production, distribution, and consumption throughout the U.S. economy has dramatic impacts on job creation and economic competitiveness, but it is inadequately understood and incompletely measured by traditional labor market tools. This data is used to generate an annual U.S. Energy and Employment Report as instructed by Congress in 42 U.S.C. 18841. This revision to the data collection will collect data on additional priority industries including the critical materials and data center supply chains, study the adoption of Artificial Intelligence (AI) in the energy sector, and promote technology neutrality throughout the survey.

(5) *Annual Estimated Number of Respondents*: 58,226;

(6) *Annual Estimated Number of Total Responses*: 58,226;

(7) *Annual Estimated Number of Burden Hours*: 13,019; and
