**SUPPLEMENTARY INFORMATION:** Under part 211 of title 49 Code of Federal Regulations (CFR), this document provides the public notice that by letter dated February 10, 2026, UPRR petitioned FRA for a waiver of compliance from certain provisions of the Federal railroad safety regulations contained at 49 CFR part 236 (Rules, Standards, and Instructions Governing the Installation, Inspection, Maintenance, and Repair of Signal and Train Control Systems, Devices, and Appliances). FRA assigned the petition Docket Number FRA-2026-0496.

Specifically, UPRR seeks relief from the requirements of § 236.566, *Locomotive of each train operating in train stop, train control or cab signal territory; equipped*, to operate historic steam locomotive Big Boy No. 4014 on portions of Norfolk Southern Railway (NS) property during a one-time tour. UPRR explains that it has discontinued cab signal systems after the implementation of positive train control (PTC), and locomotive No. 4014 cannot accommodate cab signal equipment because PTC components now occupy the locomotive cab space that previously housed the cab signal equipment. The petition states that the locomotive will operate per NS's operating procedures, instructions, and rules to maintain the "safety and regulatory compliance framework already available" on NS.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at [www.regulations.gov](http://www.regulations.gov).

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments.
